Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8 are rejected under 35 U.S.C. 101 because the claims fail to include a statutory apparatus within the body of the claims. Moreover, the activity associated with the statutory apparatus is with pre or post solution activity, merely involving receiving and sending data.

Claim Rejections - 35 USC § 112

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims the limitation "processing circuit" is vague and indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Red Herring Article (of record).

The article teaches of website known as <http://www.herocapital.com>, and teaches that "Hero Capital has invented a new kind of financial transaction that allows people to take themselves public. Specifically, we allow individuals to tap capital markets by selling the rights to a portion of their future income; the rights are then securitized and the shares listed on a national exchange. Based on anticipated retail demand, our

first target market is professional athletes. We have interest from all four major team sports and are currently pricing IPOs for multiple players. The SEC has given preliminary approval of the patent-pending security structure, and we hope to launch our first player IPOs in Q4 2001.

The reference fail to teach of listing and trading the securities in an exchange. It would have been obvious for one skilled in the art at the time to have listed the securities on an exchange and to adopt the practice of an exchange as motivated the need to increase the liquidity of these instruments. The reference fails to teach the performers to be athletes. It would have been obvious for one skilled in the art to have offered this service to athletes as motivated the need increase the present income of the performer. The examiner contends that the bid ask spread read on a probability. As to the other limitations, these limitations are routine in the art of contacts would have been obvious for one skilled in the art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
